## Meet Some of our Members [M-Z]

 <p><a href="https://www.majesteye.com/">https://www.majesteye.com/</a></p>	<p>MajestEYE is a Data Analytics Technology vendor with the mission of empowering its customers to succeed in the transition to a data driven business model. Founded by two Co-founders with complementary profiles, Business Transformation consulting and Data Science, MajestEYE crafts its vision for the value of data, its methodology for data analytics and its know-how into a proprietary technology that is generative of scalable data products for its target verticals such as Telecommunications, Financial Services, Utilities and Government Services.</p>
 <p><a href="http://www.malysolutions.co.uk">www.malysolutions.co.uk</a></p>	<p>Maly IT Solutions is a software company specialising in the Process Management of Labelling Artwork Changes. Especially for, but not restricted to, the Pharmaceutical industry. In an increasingly regulated market, it is becoming more important that Pharmaceutical (and increasingly Food and other industries) can effectively manage how and when labelling changes occur. Additionally there is a need to prove that the process is being adhered to. Our software provides a configurable, rule based solution which provides both; the project management of the process, across multiple departments and partner firms, and provides trace-ability and transparency to help with compliance needs.</p>
 <p><a href="http://marshallwolfe.co.uk/">http://marshallwolfe.co.uk/</a></p>	<p>Marshall Wolfe provides an 'over the horizon' product set for attracting and retaining the best talent. We strongly believe in embedding fair, efficient and innovative solutions into an industry which has seen far too little disruption. The rapid traction we have already received in the market confirms our belief that the 'War for Talent' is fiercer than ever. We offer our customers competitive advantage in securing the best people.</p>
 <p><a href="http://www.matrixx.com/">http://www.matrixx.com/</a></p>	<p><a href="http://www.matrixx.com/">MATRIXX Software</a> is Powering the Future™ for market-leading Digital Service Providers (DSPs) worldwide. MATRIXX Software has developed a unique real-time Digital Commerce platform, an alternative to traditional business support systems (BSS), which enables telecom service providers to profit and innovate as they transition to Digital. <a href="http://www.matrixx.com/">www.matrixx.com</a> or follow us on Twitter @MATRIXX_S</p>
<p>McGill Consulting</p>	<p>Simon McGill has been operating since June 2009 as an independent consultant program manager, assisting client (mostly banks) to scope, plan and implement technology and operational transformation.</p>

 <p><a href="http://www.metrarc.com/">www.metrarc.com/</a></p>	<p>Metrarc is developing ground-breaking technology for security applications based on deriving encryption keys from the properties of digital systems such as computers and mobile phones. The widespread adoption of encryption technology is seen as providing a solution to digital security issues, however in practice established encryption systems have an inherent weakness that the keys that are used to encrypt and decrypt data are stored and therefore if found can be used. This places a vulnerability on these systems making them potentially inefficient and insecure. Metrarc have developed ICMetrics which takes features from a digital device, derives an ICMetric, uses it to encrypt data and then discards it without storing any of the keys or templates. To unencrypt, the reverse process is followed. The lack of templates and stored keys means that files may be encrypted with much greater security than with other security systems. However, ICMetrics is designed to be used alongside and harden existing security systems. Metrarc is now further developing its ICMetrics technology platform to address the needs of e-commerce, Internet-of-Things (IoT) and blockchain applications.</p>
 <p><a href="http://mitrai.com/">http://mitrai.com/</a></p>	<p>Mitra Innovation helps smart entrepreneurs, investors and enterprises to accelerate innovative ideas into amazing global businesses and solutions. We do this through providing a range of product incubation, systems integration and digital transformation services.</p> <p>Expertise and execution are critical when it comes to achievement, and we'll provide a unique and valuable mixture of hands-on operational assistance, technological support, networking and mentoring to help make you shine. For Entrepreneurs and startups, we can launch new products and services onto the market using the proven five step 'mitra way'.</p> <p>For public sector clients, we can provide the process improvements, and new technology to deliver services to Public. We also help Enterprise clients transform and optimise the way their organisation runs with new technology solutions and digital transformation. We will make your ideas happen.</p>
 <p><a href="https://moravecediting.com/">https://moravecediting.com/</a></p>	<p>Moravec Science Editing provides substantial editing, proofreading, formatting, and pre-submission advice for research reports, white papers, and peer-review journal and conference papers. Topics include computer science and information technology, electrical and electronics engineering, and some physics. In particular, artificial intelligence, including deep learning, natural language processing, and computer vision, are topics of expertise.</p>
 <p><a href="https://muhdo.com/">https://muhdo.com/</a></p>	<p>Muhdo is a next generation health, fitness and well-being ecosystem. Muhdo technology combines DNA, fitness and environmental data, for an all round health analysis. The system provides individuals with the missing information and tools they require to start improving health and seeing results -- and it's all delivered on a unique, trailblazing technology platform.</p>
 <p><a href="https://www.mvine.com/">https://www.mvine.com/</a></p>	<p>Mvine Limited is a British deep tech company delivering next generation platforms that power the digital economy. It is perhaps best known for its work in providing cyber-secure collaboration portals, in use in the financial services sector as virtual deal rooms and in other industries as procurement portals and as diversity/equality portals. The company has also pursued identity management and its technology is used in the telecoms sector for federated authentication and in other industries for single sign on identity, authentication and authorisation. Learn more about the company online at <a href="http://mvine.com">mvine.com</a></p>

 <p>Guardians of the Connected World</p> <p><a href="https://www.netscout.com/">https://www.netscout.com/</a></p>	<p>NETSCOUT is a market leader in providing end-to-end service assurance, business analytics and network security solutions. With experience in the world's largest and most demanding service provider networks and through continuous advancement in innovation, NETSCOUT watches over all systems, services, subscribers, and vulnerabilities today and into the future with virtualization, 5G and the Internet of Things. NETSCOUT delivers real-time, traffic-based intelligence that enables customers to provide a flawless user experience by achieving extraordinary service quality and operational excellence, giving Service Providers the confidence to innovate in the connected world ready. With NETSCOUT Go Anywhere, Go Smart, Go Secure.</p>
 <p><a href="http://www.nevion.com/">http://www.nevion.com/</a></p>	<p>Moving beyond video transport to fully managed and controlled video services, Nevion manufactures award-winning systems for broadcasters, service providers and government agencies worldwide. Nevion provides best-in-class solutions for professional video services from contribution through primary distribution. Highly modular solutions encompass IP and optical transport, state-of-the-art compression and routing for any video format over any network infrastructure — within buildings or across continents.</p>
 <p><a href="https://networks.nokia.com">https://networks.nokia.com</a></p>	<p>As the world's specialist in mobile broadband, we'll help you enable your end users to do more than ever before with the world's most efficient mobile networks, the intelligence to maximize their value and the services to make it all work together</p>
 <p>A Furukawa Company</p> <p><a href="http://www.ofsoptics.com/">http://www.ofsoptics.com/</a></p>	<p>In today's environment, it is critical that your organization has cost-effective communication solutions that meet the highest standard of reliability. That is where OFS excels - providing cutting-edge fiber optic technologies at the best value. Our mission is to provide leading optical innovations by designing, manufacturing and supplying the best optical fibers, fiber cable and components for our customers' optical infrastructure, with exceptional service, creating value for our shareholders, customers and employees</p>
 <p><a href="http://openlightcomm.com/">http://openlightcomm.com/</a></p>	<p><b>OpenLightComm (OLC)</b> was founded in 2016. It is a research spin-off SME that operates in the converged landscape of Telecommunications and IT. OLC's has an extensive experience in directing and/or conducting R&amp;D which was acquired from their participation in a larger number of EU-funded and national projects. Currently OLC is involved to the H2020 METRO-HAUL project and to the Innovate-UK funded AirQKD project, both led by BT. OLC's technical focus includes 5G multi-layer architecture and performance, SDN-networking, physical layer effects and performance of optical networks and Quantum networks (QKD).</p>
 <p><a href="http://www.optalysys.com">www.optalysys.com</a></p>	<p>Optalysys develops Optical AI Processors to accelerate high resolution image analysis at incredibly fast speed and low power. Our first systems produced by our in-house team already outpace large Nvidia GPUs by an order of magnitude, yet consume only a quarter of the power. Our next in-house iteration will produce a processor two orders of magnitude higher. Yet this is only the beginning. Our optical processors will provide unseen levels of processing capability embedded into edge devices and mobile platforms which will revolutionise our daily lives.</p>
 <p><a href="https://www.ori.co/">https://www.ori.co/</a></p>	<p>Ori Industries is building an intelligent edge cloud to power a future that is smart, autonomous and immersive. We empower network operators and infrastructure owners to unlock new revenue streams and leverage their investments in infrastructure</p>

 <p><a href="http://www.oxems.com">www.oxems.com</a></p>	<p>OXEMS, has developed a revolutionary underground asset management system to help utilities locate, identify and manage their buried assets including modern plastic assets which are notoriously difficult to find once buried.</p> <p>The OXEMS System is made up of three parts; tags attached to key points on the assets, a detector deploying advanced RF technology integrated with the latest GPS and 3G communications capabilities, and an intelligent database designed to link seamlessly with utilities existing systems.</p>
 <p>Phoelex synergistic photonics electronics™</p>	<p>Phoelex Ltd has developed disruptive intellectual property that can lead to dramatic enhancement of energy efficiency and cost reduction in high speed optical transceivers. The applications of the technology cover vast range of domains, with specific emphasis on data centres. For more information email Dr. Amir Nejadmalayeri <a href="mailto:amir@phoelex.com">amir@phoelex.com</a></p>
<p>Point 2 Technologies</p>	<p>Point 2 Technologies have identified a cross sector opportunity to build on the skills and knowledge they have built up to move forward the need for quality information regarding localisation, orientation and communication within different and sometimes challenging environments. The team have already developed a Proof of Concept solution and will now work with the IM support team to move forward their exciting plans for the next stage of the company.</p>
 <p>prettytechnical <a href="https://prettytechnical.io/">https://prettytechnical.io/</a></p>	<p>Pretty Technical: Pretty Technical, Headquartered in the UK with a branch in The Netherlands, specialise in designing, developing and operating enterprise level software and products for the gaming and finance sectors. The business also provide technical consultancy and compliance-specific products for certain regulated markets.</p>
 <p><a href="https://www.prysmiangroup.com/en">https://www.prysmiangroup.com/en</a></p>	<p>A leading player in the industry of high-technology cables and systems for energy and telecommunications, Prysmian Group is a truly global company, spanning 50 countries, 82 plants, 17 research and development centers, and with about 21,000 employees. With its strong position in the market segments characterised by the highest added value, the Group is active in the development, design, manufacturing, supply and installation of a wide range of cables for the most diverse applications in the energy and telecommunication sectors. Specialising in the delivery of products and services designed to specific customer requirements, the key strengths that are the hallmark of Prysmian Group include: close focus on Research &amp; Development, the capacity to be innovative with both products and production processes and the use of advanced proprietary technologies</p>
 <p><a href="https://www.quatreus.com/">https://www.quatreus.com/</a></p>	<p>We design and develop engaging and memorable live experiences that add value to brands - and create innovative &amp; affordable ways for our clients to communicate more effectively with their staff, their stakeholders and their customers. Our work includes events &amp; conferences, live event production, exhibitions &amp; trade-shows, engagement &amp; relationship programmes, content development and customer experience centres – and we also offer a managed event support and logistics service... and we care about our environment too with quantitative targets for minimising impact and improving sustainability.</p>

 <a href="http://www.radiandesign.co.uk">www.radiandesign.co.uk</a>	<p>Radian Design is an industrial design and product development consultancy. Together with our clients, we develop new products and technologies from concept, through design and development to manufacture. Our clients benefit from the specialist knowledge and experience we have built up over years of designing manufactured goods from medical to biotech, consumer to commercial products. We understand the value that good industrial design can add to a product. Our view of the product design and development process is that it is best approached in a multi-disciplinary way. We like to work closely with our clients, associates and manufacturing partners to design a product as a whole. Our involvement in the design process can span feasibility studies to concept design, industrial design and engineering development including prototyping, intellectual property and design for manufacture.</p>
 <a href="https://rainbird.ai/">https://rainbird.ai/</a>	<p>Rainbird is an intelligent automation platform that lets you automate complex decision-making, at scale. Rainbird's automated decisions are typically 100x faster and 25% more accurate, while being fully explainable. The Rainbird platform has two main parts: the studio (a no-code visual editor for modelling the decision-making processes of experts) and the inference engine (which uses the models created in the studio to automate decision making, at scale)</p>
 <a href="http://www.randomcolouranimal.com/">http://www.randomcolouranimal.com/</a>	<p>Random Colour Animal is a creative agency, specialising in brand marketing and communications. We create, grow and evolve brands to build strong lasting relationships with people across all touchpoints in the customer journey.</p>
	<p>Reality Zero One (R01) was formed in 2017 and gained its first pre-seed funding later that year. We are a core team of three people with a London based studio for development and offering 3D scan services, and an extended remote network of supporting hardware and software engineers. We are currently focussing on product development (pre-revenue) with product release expected later this year and are looking to proceed towards further fundraising around Q3-4 2019. Our product (once complete) is a solution to simplify and automate the capture of real-world objects and conversion to digital 3D assets and experiences. Target user sectors include digital production creatives (TV &amp; film), games developers, arts &amp; heritage, education, 'makers' (physical &amp; digital), digital product promotion and marketing. Some examples of our results here: <a href="https://sketchfab.com/reality-zero-one">https://sketchfab.com/reality-zero-one</a> <a href="https://www.facebook.com/RealityZeroOne/">https://www.facebook.com/RealityZeroOne/</a> Other enterprise level 3D capture solutions tend to be high cost and/or require advanced skills to use. We produce 'studio quality' results at low cost and with high levels of user automation. These benefits streamline user workflow, reducing cost and expanding access to new user sectors without large budgets and high levels of expertise.</p>
 <a href="https://www.rokker.co.uk/">https://www.rokker.co.uk/</a>	<p>We are a design-led Business and Management Consultancy. We make current your propositions and services better for your customers while also creating new propositions and services for a more sustainable and exciting future.</p>
 <a href="http://www.rsmuk.com/">http://www.rsmuk.com/</a>	<p>Employer Services is the outsourcing arm of RSM, a leading UK and international provider of accountancy and business advisory services. Employer Services is a technology based business and provides a range of outsourced accounting, payroll, billing and time recording and corporate secretariat services for organisations.</p>

**RUSHMERE  
TECHNOLOGY**

<http://www.rushmeretechnology.com/>

Rushmere Technology is a leading developer of photonic communication solutions for optical access (fibre-to-the-home FTTH) and 5G fronthaul networks. Our novel, low cost, high-speed, dense wavelength division multiplexed (DWDM) products make fibre networks affordable for next generation broadband and 5G mobile. We work with international customers and partners to create products that bring innovative solutions to market

[www.salesforce.com](http://www.salesforce.com)

Salesforce is the #1 CRM, bringing companies and customers together in the digital age. Founded in 1999, Salesforce enables companies of every size and industry to take advantage of powerful technologies—cloud, mobile, social, voice, and artificial intelligence—to connect to their customers in a whole new way. The Salesforce Customer 360 is an integrated CRM platform, powered by AI, that unites marketing, sales, commerce, IT and analytics departments. It gives these teams a single, shared view of their customers so they can work together to build lasting, trusted relationships and deliver the personalized experiences their customers expect. Salesforce is committed to a set of core values--trust, customer success, innovation, and equality of every human being. Salesforce is one of the leaders on Fortune’s Change the World list, and has been one of Fortune’s 100 Best Companies to Work For, for twelve years in a row. Salesforce is headquartered in San Francisco with over 50,000 employees globally, is currently #190 out of the Fortune 500 (2020), and is publicly listed on the New York Stock Exchange as CRM (2004).

<https://www.seven-resourcing.com/>

Seven Resourcing is a specialist recruitment company established in 2011. Placing candidates in the fields of Social Care, Life Sciences, Healthcare, Dentistry, Criminal Justice, Nursing, Animal Health, and many more, we know exactly what qualifications and experience our candidates need to be able to hit the ground running in their new role.

[www.sightcall.com](http://www.sightcall.com)

SightCall is the global leader in AR-powered video support for enterprises. SightCall enables companies to see and diagnose issues remotely, reducing truck rolls, increasing first time fix and decreasing down time. Our technology empowers organizations to guide their customers and technicians to problem resolution with remote visual assistance. For over 10 years, SightCall has helped companies achieve digital video transformation in: Insurance & Financial Services, Manufacturing, Aerospace, Home Automation, IoT & Telecom, Energies & Utilities and Public Sector industries. SightCall is headquartered in San Francisco with offices in Paris, NYC, London, Frankfurt and Singapore. Our partners include Salesforce, ServiceMax by GE Digital, Accenture and more. For more information, visit [www.sightcall.com](http://www.sightcall.com) and follow us online @sightcall.

The Experts in Start-Up and Corporate Alignment

[SILVERBACK-CONSULTANTS.COM](https://silverback-consultants.com/)

<https://silverback-consultants.com/>

Silverback Consultants Ltd bring over 30 years’ experience of matching global innovations with corporate business opportunities and needs. For the Corporate, we understand and translate their core business drivers to find and bring innovation and start-ups to them, which can accelerate them towards their business goals. For the Start-up, we are able to understand their offering, translate it into corporate language and take them into key businesses. In this way, we help them to fast-track the validation of their offering and generate qualified opportunities to accelerate the success of their venture. This makes Silverback Consultants particularly attractive to non-UK start-ups, as we can be local UK representation, providing maximum exposure to UK corporates, all at minimal cost and minimal risk. At the same time, we satisfy a gap until a business is successful enough to justify a fulltime UK team.

	<p>Sketchbook Games is a video game development studio currently working on story focused platformer, Lost Words (formerly The Last Word). The company was founded by game designer Mark Backler who has worked in the games industry for 10 years at companies like Electronic Arts, Sony and Lionhead Studios on games including Harry Potter and the Order of the Phoenix and Fable 2.</p>
 <p><b>SKULL MOUNTAIN</b>  <a href="https://www.skull-mountain.com/">https://www.skull-mountain.com/</a></p>	<p>We are specialists across the full digital product function (Product Management, Product Leadership, Product Ownership and Project Management). We provide in-house and external consulting services, training and people.</p>
 <p><b>Smart Networked Environments</b>  <a href="http://www.smartne.com/SNE/">http://www.smartne.com/SNE/</a></p>	<p>Smart Networked Environments provides location-based information systems for university campuses, large institutions, city centres and counties. The systems are built on SmartNE's own WAI2Go software platform and range from bespoke interactive indoor/outdoor maps with positioning and navigation to the integration and visualisation of large and diverse external datasets. The maps are smart and highly scalable and allow users to take a bird's-eye view or seamlessly zoom right into a building to view a room layout. Inbuilt step-by-step wayfinding caters for both pedestrians and impaired-mobility users and extends to multi-mode transport options. Authorised users have a dashboard to modify routes manually and can programme paths or entrances to prevent their use at certain times. The WAI2Go platform interfaces to external systems, databases and information sources and dynamically associates data with mapped locations making the maps highly suited to town guides, site services and IoT applications. It is unique in its ability to consolidate complex geographic information with location-based information/services across the widest range of user end-devices.</p>
 <p><b>Smartisant</b>  <a href="https://smartisant.com">https://smartisant.com</a></p>	<p>Smartisant's is delivering intelligent assisted living for all. Our focus is on contextual smart homes but our innovation is equally suited to other smart buildings and smart spaces. The company is based on many years of innovative research and has a number of products in development. The company provides consultancy on smart homes, buildings and other spaces. Smartisant's primary differentiator is our focus on improving quality of life, whilst protecting privacy. We embrace a holistic approach to the smart home that enables shared context across services, to deliver a simpler, more intuitive and seamless user experience. We utilise open-source hardware and integrate best-of-breed technology from 3rd parties, to enable commercial grade, intelligent smart spaces in a cost-effective manner.</p>
 <p><b>Sound Extensions</b>  <a href="http://soundextensions.com">http://soundextensions.com</a></p>	<p>Sound Extensions was founded in Suffolk, UK, in 2019 to enhance the audio experience of recorded media, ultimately by making the impossible and inaccessible available to sports and documentary production. Technology and art working together to deliver an immersive audio experience. Over the coming year, the aim is to build a small number of innovative demonstrators that will show what can now be achieved when you combine sophisticated software and high-speed networking with a lot of ingenuity. You will hear more from Sound Extensions!</p>
 <p><b>spirent</b>    Promise. Assured.  <a href="http://www.spirent.com">http://www.spirent.com</a></p>	<p>Spirent Communications (LSE: SPT) is a global leader with deep expertise and decades of experience in testing, assurance, analytics and security, serving developers, service providers, and enterprise networks. We help bring clarity to increasingly complex technological and business challenges. Spirent's customers have made a promise to <i>their</i> customers to deliver superior performance. Spirent assures that those promises are fulfilled.</p>

 <p><a href="https://www.sterlitetech.com/portfolio/telecom-productsvic">https://www.sterlitetech.com/ portfolio/telecom-productsvic</a></p>	<p><u>STL</u> is an industry-leading integrator of digital networks. Our fully 5G ready digital network solutions help telcos, cloud companies, citizen networks, and large enterprises deliver enhanced experiences to their customers. STL provides integrated 5G ready end-to-end solutions ranging from wired to wireless, design to deployment, and connectivity to compute. Our core capabilities lie in Optical Interconnect, Virtualised Access Solutions, Network Software, and System Integration. We believe in harnessing technology to create a world with next-generation connected experiences that transform everyday living. With a global patent portfolio of 569 to our credit, we conduct fundamental research in next-generation network applications at our Centre of Excellence. STL has a strong global presence with next-gen optical preform, fibre, cable, and interconnect subsystem manufacturing facilities in India, Italy, China, and Brazil, along with two software development centres across India and a data centre design facility in the UK.</p>
 <p><a href="http://www.stratissecurity.com">www.stratissecurity.com</a></p>	<p>Gain complete peace of mind over your home and business with unique patented technology from Stratis security. We know the devastating impacts of Crime on homes and businesses. Working with the most innovative product developers globally, Stratis delivers a suite of leading-edge security technologies to meet the exacting needs of our clients. Whether you're a homeowner, tenant or landlord, you want the same thing; visibility. Our solutions give you the intelligence you need to see exactly what threats you are facing and the measures to eliminate them completely. Whether providing-end-to-end security solutions across an entire site or smaller installations at a single residency, we do this at a price that's affordable and in a professional and discrete manner.</p>
 <p><a href="http://www.subexworld.com/">http://www.subexworld.com/</a></p>	<p>Subex Limited is a leading global provider of Business Support Systems (BSS) that empowers communications service providers (CSPs) to achieve competitive advantage through Business Optimisation - thereby enabling them to improve their operational efficiency to deliver enhanced service experiences to subscribers. Subex's customers include 28 of top 50 operators and 33 of the world's 50 biggest telecommunications service providers worldwide. The company has more than 300 installations across 70 countries.</p>
 <p><a href="http://www.t8lk.co.uk/">http://www.t8lk.co.uk/</a></p>	<p>T8LK is a fully focused reseller channel for Hosted phones, Lines &amp; Calls and Broadband. T8LK has "one simple platform" for ordering and processing any of our services and is a fully white labelled system offering all its resellers their own telecoms company through its one simple platform portal. We offer fully white labelled</p> <ul style="list-style-type: none"> <li>• Hosted phones (pbx)</li> <li>• Analogue lines</li> <li>• ISDN lines</li> <li>• Broadband</li> <li>• Leased lines</li> <li>• 4G broadband</li> <li>• Satellite broadband</li> <li>• End user billing</li> <li>• Customer support</li> </ul>

 <p><b>TATA CONSULTANCY SERVICES</b></p> <p><a href="http://www.tcs.com/">http://www.tcs.com/</a></p>	<p>Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world’s largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.</p> <p>A part of the Tata group, India's largest multinational business group, TCS has over 453,000 of the world’s best-trained consultants in 46 countries. The company generated consolidated revenues of US \$22 billion in the fiscal year ended March 31, 2020, and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index. For more information, visit us at <a href="http://www.tcs.com/">http://www.tcs.com/</a></p>
 <p><b>Tech Mahindra</b></p> <p><a href="http://www.techmahindra.com">www.techmahindra.com</a></p>	<p><a href="#">Tech Mahindra</a> represents the connected world, offering innovative and customer-centric information technology services and solutions, enabling Enterprises, Associates and the Society to Rise™. We are a USD 4.0 billion company with 105,400+ professionals across 90 countries, helping over 800 global customers including Fortune 500 companies. Our innovation platforms and reusable assets connect across a number of technologies to deliver tangible business value to our stakeholders. Tech Mahindra is also amongst the Fab 50 companies in Asia as per the Forbes 2015 List.</p>
 <p><b>TDS</b> Tethered Drone Systems</p> <p><a href="https://tethereddronesystems.co.uk/">https://tethereddronesystems.co.uk/</a></p>	<p>Providing indefinite and autonomous flight with multifunctional capability designed to deliver operational solutions.</p> <p>Tethered Drones will become the commercial solution for communication, broadcasting, incident and agriculture management, inspection maintenance and high risk repetitive tasks both on and off shore. With no UK manufactured solution and limited global competition TDS is building an innovative platform to win a significant share of this lucrative market.</p>
 <p><b>tethir.</b></p> <p><a href="https://www.tethir.co.uk/">https://www.tethir.co.uk/</a></p>	<p>Tethir is commercialising a breakthrough in wireless laser-based optical communication technology, known as Free Space Optics (FSO). FSO products are typically sold into the military and markets such as inter-satellite communications but have been held back from more mainstream markets by impracticalities, including the size of the transceivers and the necessity to use tracking motors to maintain link alignment. Tethir has made a fundamental breakthrough in FSO technology that removes these impracticalities. The breakthrough can be applied in a number of ways, with the following elements traded off against each other: Bandwidth, power, link length, beam width, cost, size. The initial focus is on developing small, low cost transceivers that transmit through windows, enabling network operators to connect new fixed wireless access customers quickly and without the need for tradesmen</p>
 <p><b>tm services</b></p> <p><a href="http://tm-services.co.uk/">http://tm-services.co.uk/</a></p>	<p>We are an innovative company with experience and talent in the Event Staging, conference and installation arena. Operating from our facility in Suffolk, we bring together professional equipment and uncompromising personnel to help stage seamless and compelling events</p>

<https://www.torryharris.com/>

The integration experts.

Torry Harris Integration Solutions (THIS) enables meaningful digital ecosystems through adoption and use of API driven digital opportunities. The company is a trusted advisor to enterprises worldwide, helping them extend the power of digital access through integration. As a recognized leader in API Strategy and delivery, we bring over two decades of focused expertise in delivering business-outcome based IT solutions to accelerate enterprise digital transformation initiatives, API Management, Digital Ecosystem Enablement and Digital Marketplace strategies.

As part of digital enablement, we provide coaching and digital upskilling services to equip individuals and teams to execute with confidence, use relevant digital tools and skills to meet enterprise digital objectives. We are headquartered in New Jersey, USA with offices in UK, Ireland, France, Germany, UAE and India.

We are middleware born and bred. This focus, in the days of large, rigid broad-spectrum generalist service providers is refreshing and necessary. This focus has also helped draw and retain the best talent from around the world, earning us the title of a "techie heaven"!

[www.threecell.co.uk](http://www.threecell.co.uk)

3Cell has more than ten years of experience in the telco industry in multiple countries, with a range of technologies and vendors for network planning and optimisation consultancy focused on LTE and 5G. We are developing a unique big data platform to support companies to achieve scalable and future-proof digitisation by utilising AI/ML technologies. 3Cell is working on 5G solutions with academic support from within and outside of the UK. We aim to enable the demonstration, test, and evaluation of new 5G-technologies for fixed and mobile connectivity in remote rural areas. Our latest solution uses drones to capture detailed geolocation data and images of a telecommunication tower and surrounding areas from selected altitude and points to create a 3D model. The resulting survey report provides detailed insights into the current parameters and 5G performance which can then be checked and optimised, removing the need for expensive and time-consuming inspections by engineers on-site and eventually excessive drive testing.

<http://www.trustedrenewables.com/home.html>

Our company was founded in 2008 by a team of telecoms, computing and IT security specialists with a world-class track record of innovation.

Our mission is to provide focussed thought leadership to exploit ICT for Renewable Energy, Carbon Reduction and Smart-Metering projects.

We are developing a secure, trusted architecture based upon best practice for e-commerce, applicable to the renewable energy and carbon reduction fields

We offer a number of services including full campaign audits for companies currently running their own paid search campaigns through to in-house training, consultancy and the day-to-day running of PPC and paid social media campaigns on behalf of clients. Our client list covers a variety of sectors including holiday and tour operators, travel services, retailers, education and b2b companies. The team at Unscrambled are all Google AdWords certified and we are a Google Agency Partner. We manage and consult on campaigns across a variety of media platforms which include Google paid search, Google Shopping, Google Display and Re-Marketing, Bing/Yahoo, Facebook and LinkedIn.

 <p><a href="https://www.urban-scan.com/">https://www.urban-scan.com/</a></p>	<p>UrbanScan is an Israeli 5G IoT company developing a new class of outdoor monitoring platform that yields comprehensive real-time information about vehicles, pedestrians, and other entities in urban settings, industrial sites, business parks, and beyond. The system's costs per unit area monitored are significantly lower than those of the current alternatives (e.g., CCTV). This makes full (100%) coverage of wide outdoor areas feasible for the first time. Furthermore, it can produce very accurate high resolution information in all lighting and weather conditions. The comprehensive coverage and high availability enables sophisticated automated scene analysis and rapid response to changing situations. UrbanScan's technology utilizes an array of sensors that receive signals emitted by cellular networks that have been reflected by objects in the surrounding area. Our main applications are site security, public safety, border surveillance, drone detection, and smart city applications such as smart parking and traffic flow monitoring.</p>
 <p><a href="http://www.trustvesta.com">www.trustvesta.com</a></p>	<p>Vesta is a leading fintech company and the forerunner in guaranteed e-commerce payment solutions. Founded in 1995, Vesta pioneered the process of fully guaranteed card-not-present (CNP) payment transactions for the telecommunications industry. Since then, we have expanded our data science and machine learning capabilities across the globe and solidified our position as the leader in the e-commerce guaranteed payment space while launching a range of new complimentary products &amp; services that support full digital E2E account onboarding, verification &amp; protection with our Account Protect offering. Today, Vesta guarantees more than \$18B in transactions annually. Quite simply, our scalable solutions enable merchants to eliminate fraud and substantially grow revenue by delivering secure, frictionless transactions that maximize acceptance and improve the customer experience, all backed by a zero-fraud-liability guarantee.</p>
 <p><a href="http://www.viavisolutions.com/en">http://www.viavisolutions.com/en</a></p>	<p>Viavi offers fully integrated and interoperable solutions for network testing, performance optimization, and service assurance. Designed to support the most complex IT and communications networks, our solutions deliver unparalleled visibility across the entire network and service ecosystem at all stages of the lifecycle. We provide the real-time intelligence and actionable insight our customers need to consistently attain optimum performance and QoE from end-to-end.</p>

[www.vilicom.com](http://www.vilicom.com)

At Vilicom we harness wireless technology, data and intelligent analytics across a diverse range of industries to deliver unprecedented productivity and efficiencies. We're at the forefront of innovation in smart wireless solutions, designing, installing and managing the networks that empower people across the world with the freedom to communicate and work from anywhere. Our capabilities and services have global reach, with our projects spanning over 20 countries and four continents, partnering with some of the biggest companies in the world to help them realise their greatest ambitions. As critical as the design of a wireless communication solution is its integration. At Vilicom, we specialise in implementing systems into innumerable and varied environments from corporate headquarters to stadiums and arenas. No matter how complex the project, our engineers have the expertise to deliver seamless communications that deliver for our clients and in turn their customers. Vilicom's professional range of services are unsurpassed, delivering on time and within budget, using only highly technically qualified engineers are paramount to our continued success.

Special Coverage Solutions & Small Cells: Our network solutions span the globe, and are integrated into every aspect of life from transport infrastructure, Airports, Stadiums, Shopping Malls, High footfall areas to complex manufacturing.

Design and Optimisation: We specialise in the design and optimisation of wireless systems. No matter how complex your project, or its implementation, our engineering expertise is adept at developing innovation solutions.

Project Management: Every project is unique, with specific demands requiring a specific approach. No matter what the nature of your project, our stringent project management process ensures you'll meet your objectives.

Strategic Consulting: Across a spectrum of industries, we provide our clients with strategic advice that empowers their business and enhances their reputation. Our experience is unrivalled and extends across diverse areas of expertise.

Testing & Benchmarking:

An effective solution is such because efficient testing and benchmarking supports it. Our approach is based on the belief that if there is scope to enhance any aspect of your wireless communication - we'll find it.

virtusa

<https://www.virtusa.com/>

 <p><a href="https://vyntelligence.com">https://vyntelligence.com</a></p>	<p><b>Vyntelligence*</b> (Vyn) is a pioneering mobile-first enterprise-grade short video AI and Analytics platform. By enabling field-based workforce and customers to capture short guided videos from their smartphone in the form of a “self-audit”, Vyn saves costs, improves first-time right metrics and delivers a better customer experience. The platform uses machine learning &amp; AI to automatically label, tag and categorise the video data stream to make it searchable and actionable. Further, Vyn can confidently predict ‘next-actions’, enabling business leaders to make faster decisions. Headquartered in London, UK, the Vyn SmartVideoNotes technology has been deployed by leading businesses in the utility, energy, telecoms and manufacturing industries. Vyn has been granted US patents for Smart Data Capture, Ranking and Delivery of Insights.</p> <p>*Vyn and Vyntelligence are registered trademarks of humanLearning Ltd. The company is headquartered in London, UK. <a href="https://vyntelligence.com">https://vyntelligence.com</a>.</p>
 <p><a href="https://www.walkme.com/">https://www.walkme.com/</a></p>	<p>WalkMe empowers business leaders to realize the promise of their people and their technology investments - the organization’s two most valuable assets. WalkMe Digital Adoption Platform (DAP) adapts software to meet the needs of your employees and customers. Our patented technology places an invisible overlay on top of all your applications allowing you to gain insights into user behaviour and create in-application experiences that empower your users to be more productive and efficient.</p> <p>Since 2016, British Telecom, one of the largest telecommunication companies in the world, has been a WalkMe customer. They use the technology solution across three main business applications helping all their Salesforce to navigate through the complex processes of placing a customer order and also finance users adopt new SAP based applications. It makes the whole flow easy and intuitive, reducing fall outs and creating data accuracy.</p> <p>Founded in 2011, and catering over 2,000 companies globally across all industries, including 30% of the Fortune 500, WalkMe has offices in San Francisco, New York, Raleigh, London, Paris, Berlin, Tel Aviv, Singapore, Sydney and Tokyo.</p>
 <p><a href="http://www.wheatleysolutions.co.uk">www.wheatleysolutions.co.uk</a></p>	<p>Since 1991 Wheatley have been experts and innovators in delivering software solutions to the UK’s electricity, gas and latterly water markets. These include physical asset management, workforce management and meter operations support. These solutions enable both established operators and new entrants to succeed in the UK’s competitive utility market.</p>
 <p><a href="http://www.williams-schone.com">http://www.williams-schone.com</a></p>	<p>William Schone are a global boutique human capital firm specialising in senior level executive search, leadership development and advisory. From early stage startups to major international corporates, we partner with our clients, helping them build teams and develop future business leaders that ensure their organisations succeed.  <p><a href="http://www.zoarobotics.com/">http://www.zoarobotics.com/</a></p>	<p>ZOA Robotics is pioneering the development of a low-cost robotics platform, enabling the automation of power, telecoms &amp; industrial plant inspections, using highly mobile four-legged robots. Inspections are labour intensive but difficult to automate, as sites require a high degree of mobility to tackle uneven ground and stairs. ZOA is building a turn-key Robot-as-a-Service (RaaS) solution for Plant and Maintenance Managers, delivering inspection reports and trend analysis to support Operation &amp; Maintenance decision making.</p>

<http://www.zogenergy.com/>

Zog Energy is a domestic energy supply company started by two double Queen's Award winning entrepreneurs. Zog's founders wanted to find the best energy solution for their own families and realised how difficult it is to work out the best rate amongst the big six providers. This made them think what they would do if they ran their own energy company. This is why Zog offers a transparent tariff which is easy to understand and which they hope will appeal to domestic consumers. The sole purpose of Zog is to provide its customers with the best possible value energy. To achieve this the company keeps its running costs as low as possible. Using their specialist knowledge of the software industry the founders have invested in the best value technology available to keep costs down. They use cloud computing and efficient customer service management systems. Having low overheads and nobody else to answer to, they can create great deals for their customers. Zog is starting with gas because this is normally the highest proportion of domestic customers' annual fuel bill. The majority of customers in the UK are still stuck on old tariffs which do not give them the lowest price. Zog aims to help people save money by offering the most competitive prices possible and making it easy with a quick and simple switchover process.
